

Corporate Factsheet

Fluofarma is a High Content Screening company providing functional analysis through all the steps of your discovery pipeline.

Fluofarma services

TARGET VALIDATION	High throughput functional target validation
DRUG DISCOVERY	Library screening, lead selection & optimization
MECHANISM OF ACTION	Drug profiling & identification of the mechanism of action
PREDICTIVE TOXICITY	Ecotoxicity, cytotoxicity & genotoxicity
SCIENTIFIC ADVICE	Oncology, neurobiology, apoptosis & cell stress

Fluofarma added value

Proprietary technologies for large scale cell-based assays

A team of scientists and an unrivalled network of experts

Flexible business relationship and custom-made services

Fluofarma High Content Technologies

Automated cell biology platform bringing flow cytometry to the industrial scale.

Recombinant fluorescent biosensors reporting specific molecular events in the relevant cellular context.

Predictive cellular models including engineered cell lines, primary cultures and unicellular organisms.

Multiplexed assays quantifying several cellular events simultaneously in single cells.
